2. Citations and explanations (Rule 70.7)	<p>1. This report makes reference to the following document:</p> <p>D1: EP 1 207 654 A2</p> <p>2. Document D1 is considered to constitute the prior art closest to the subject matter of claim 1 and discloses (the references in parentheses are to that document):</p> <p>2.1 A process for operating a first and a second radiocommunications systems comprising a plurality of radio stations, in which the radio coverage zones of the first and second radio communications systems overlap at least partially, and a message with instructions for organising communications within the second radiocommunications system is sent by the first radiocommunications system to at least some of the radio stations of the second radiocommunications system (<i>inter alia</i> paragraphs [0011], [0045], figures 1 and 3).</p> <p>2.2 The subject matter of claim 1 therefore differs</p>

	<p>from the known disclosure of D1 in that the message from the first radiocommunications system instructs at least one radio station of the second radiocommunications system to forward the information contained in the message and relating to the organisation of communications within the second radiocommunications system to other radio stations of the second radiocommunications system.</p> <p>2.3 The subject matter of the process claim 1 (and of the corresponding system claim 11) is thus novel (PCT Article 33(2)).</p> <p>2.4 The present invention can therefore be considered to address the problem of better harmonising the operation of the two overlapping radio systems.</p> <p>2.5 The solution to this problem, as proposed in claims 1 and 11 of the present application, involves an inventive step (PCT Article 33(3)) for the following reasons:</p> <p>Since the first radiocommunications system instructs a radio station of the second radiocommunications system to forward to the radio stations the information relating to the organisation of communications in the second radiocommunications system, the organisation of the second radiocommunications system is actively controlled by the first radiocommunications system. This type of control by means of a radio station is neither described nor suggested by the</p>
